COMPUTER HOUSE, INC.

ESCAPE MCP 120BK

You have been teleported to the innermost circuits of your computer. Try to race your way through as many levels of logic as possible without being annihilated by the Main Control Program. Can you escape through ten different screens to completely defeat the MCP?

POTPOURRI

TODDLER TUTOR 201BK

Learning the alphabet and numbers are a part of the exciting initial educational experience of our tutor series. The abilities to remember and match are also enhanced with this package. Give your preschooler the advantage of a headstart with the four programs in this game-like package.

(Preschool)

Educational Programs - For Learning

SKETCH & PAINT 112BK

Enjoy the excitement of creating your very own computer graphics. Use your joystick to draw colorful high resolution pictures on the screen, then save them on tape or disk for later enjoyment. Added features allow single keystroke special graphic effects and sound.
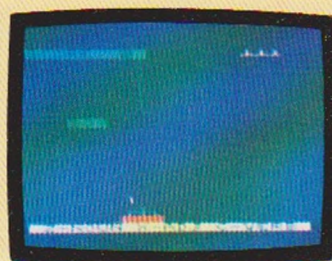

EDUCATIONAL

PRIMARY MATH TUTOR   200BK

Get off to a good start in school with the four math programs in this tutor series. Graphic instructional method with drill and practice follow-up prevail in this tutorial of simple addition, addition with carry, simple subtraction, and subtraction with borrowing.

(Grades 1 - 4)

MATH TUTOR   202BK

Tutorial with computer graphic representation on the concepts of multiplication, division, column addition, and long number subtraction? These four programs continue the math series with instruction, drill and practice, graphic aids, and performance reviews. Now you can have a full-time MATH TUTOR.

(Grades 3 - 6)

EDUCATIONAL GAMES

ENGLISH INVADERS GAMES   204BK

English can be fun! These educational games drill on the fundamentals of English using nouns, verbs, adjectives, adverbs, and other aspects of our language in an exciting computer arcade format. It really is fun to learn when playing English Invaders, Wordspot, Vowel Saucers, and Smash.

(Grades 1 - 8)
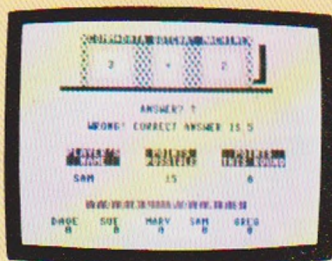

GOTCHA MATH GAMES   203BK

Math really is fun when you play Invaders, Derby, Drag, and Gotcha. Four educational games all on target for addition, subtraction, multiplication, division, and fun. Ferment, flurry, fluster, and frenzy all add up to excitement when learning with GOTCHA MATH GAMES.

(Grades 1 - 8)

ARCADE STYLE GAMES

APE CRAZE 131BK

Think you're tough? You'll have to be tough to defeat the Giant Ape! Jump and climb the platforms while avoiding bombs the ape is tossing at you! Escape to the next screen and the bombs get smart - they follow you! Collapse the superstructure and destroy the ape.

Arcade Style Games - For Action

FIRING LINE 116BK

Blasting away space debris and asteroids is tough enough, but can you handle the marauding aliens terrorizing the inter-galactic energy corridor? Command your straddlecraft along the corridor and use its energy to burst into action. Your survival depends on you - you are on the FIRING LINE.

ARCADE STYLE GAMES

PEGASUS ODYSSEY 147BK

Combat the malicious killer bats that are attacking your mountain homeland. Direct your mystical winged horse against the attackers. Defeat the bats, then swoop down and crush their eggs before even deadlier bats spring forth. You are on a PEGASUS ODYSSEY.
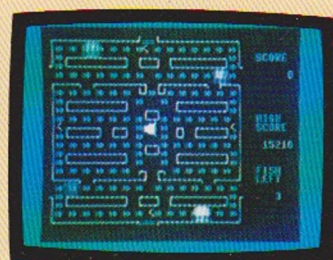

(VIC-20™ 1 player, Commodore 64™ 1 or 2 players)

SUPERCUDA 129BK

Face the unpredictable hazards of the undersea world with SUPERCUDA. Avoid the marauding octopus, fish hooks, and crabs in this multiple screen environment while consuming as many of the smaller fish as possible! Eat an occasional eel for that extra charge needed when facing certain death.
